Active Ingredient	:	Trypan Blue 0.6 & 0.8 mg / ml
Concentration	:	0.06% & 0.08% w/v
Packaging	:	1ml. Vial, single use unit dose
Box Packaging	:	05 / 10 vials in a box

Description :

Omni Blue is a vital dye, used to visualize the Capsulorhexis during cataract surgery in the absence of red fundus reflex. It stains the anterior Lens capsule offering excellent visualization in eyes with mature cataract. Omni Blue is a sterile preparation of Trypan Blue in an isotonic, buffered solution.

Indications :

1. Used as an aid in ophthalmic surgery
2. Used as a staining agent
3. Detects PC rupture
4. Anterior / Posterior Capsulotomy
5. Phacoemulsification
6. Non Phaco SI Cataract surgery
7. ECCE

Warning and Precautions :

1. Unit dose. For single use only. Discard remaining Solution after use.
2. For Intra Ocular use only.
3. Not for IM / IV injection
4. May temporarily stain hydrophilic foldable lenses. Please exercise caution when using hydrophilic lenses.

Contraindications :

No contraindications have been reported till date.

Care must be taken on patients known to be hypersensitive to Trypan Blue or Similar dyes.

Storage :

Keep in cool dry place, protect from light.

Supply :

Available in 1 ml vial single unit, unit dose in pack of Five or Ten.

Method of Use :

Prior to injecting the dye, it is advisable to minimize the fluid in the anterior chamber. This will prevent dilution of the dye and offer better staining. Omni Blue is injected into the eye on the lens capsule till the capsule is clearly stained.
